The most famous and interesting example in Game Theory is the Prisoners Dilemma. The reason why it is called a Prisoner's Dilemma is because it is a game where two players are faced with a choice between self-interest and cooperation. The Prisoner's Dilemma is a classic example of a game where the rational choice for each player is to defect, but the best outcome for both players is to cooperate. This is why it is called a Prisoner's Dilemma. The Prisoner's Dilemma is a classic example of a game where the rational choice for each player is to defect, but the best outcome for both players is to cooperate. This is why it is called a Prisoner's Dilemma. The Prisoner's Dilemma is a classic example of a game where the rational choice for each player is to defect, but the best outcome for both players is to cooperate. This is why it is called a Prisoner's Dilemma.
